# CeB Debit Card Mobile Controls and Alerts User Guide

## Getting Started
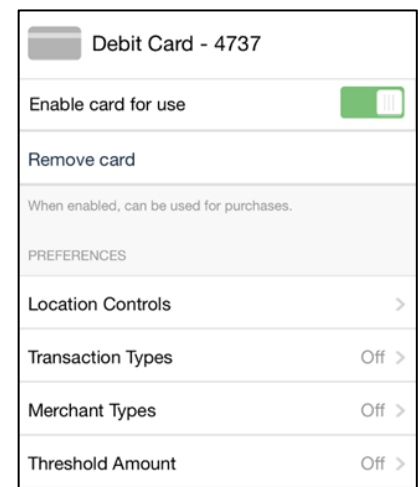

1. To access **Card Controls** or **Alerts**, click the **More** option within the mobile banking app.

Apple iOS                    Android

## Card Controls

Card Controls enable you to lock or unlock your debit card to prevent or allow transactions.

1. To enable your debit card for mobile use, slide the toggle right and it will change to green. To disable your card, slide the bar to the toggle left and it will change to gray.

2. To remove a debit card, select **Remove card**. Once removed, you can choose **Add** to add a card back.

3. Under **Location Controls**, you can select up to 3 regions to allow transactions from. You can also **Block International** transactions. Online purchases will not be blocked, only in-person transactions.

4. **Transaction Types** enables you to control which types of transactions are permitted. Options include: In-Store, eCommerce, Mail/Phone Order, Auto Pay, ATM, or All.

5. **Merchant Types** lets you set transaction controls for specific merchant groups. Options include: Department Stores, Entertainment, Gas Stations, Groceries, etc.

6. Under **Threshold Amount**, you can set a purchase limit. Anything over the set amount will be declined.

# Alerts

Alerts enable you to manage the notifications you receive.

1. Select **None** to receive no transaction alerts.

2. Select **All Transactions** to receive an alert for every transaction on your debit card.

3. Select **Choose Your Alerts** to specify what type of alerts you receive.

4. Select **Merchant Alerts** to receive alerts for specific merchant types.

5. Select **Transaction Alerts** to receive alerts for specific transaction types.

6. Slide the toggle right to enable **International Transaction** alerts.

7. Under **Threshold Amount**, you can set a rule to receive an alert if transactions are over a certain amount.
